

PRESS RELEASE

the orchid lounge chair

this lounge chair is part of silence and grace's first collection, that pays homage to the great designs of 50's and 60's using today's materials and structural knowledge.

the orchid is a fluent and most important seamless shape, comfortable to sit on even without any upholstery and is designed with a love for detail.

the natural contours and its organic forms inspired by the leaves of an orchid, smoother the body as you sit down and as you lean back the backrest flexes slightly.

the shell is constructed of a one-piece moulded recyclable plastic and is mounted on a chrome steel base.

the prototype was recently shown at 100%design london for the first time and is currently prepared for mass production.
